

[Theme Joomla](#) Sublime sets a subtle tone with sharp, contrasting colors overlapping dark textured backgrounds, this creates an ideal site template structure for a personal blog or similar.

Sublime is a fixed width template (designed for browser sizes 1024 X 768 and up) with an external right column. The design uses a combination of transparent images and DIV elements, to create a deep textured, layered effect. This template validates both XHTML and CSS in all major browsers, and is also semantically coded with fully detailed CSS, plus also has a built in Theme Style (Typography) for specific style elements.

- Fixed width (1024 X 768) and up
- Transparent PNG and DIV structure
- CSS and XHTML compliant and validated
- Detailed typography and style guide, commented CSS
- Theme Styles built into template
- Works in all Major Browsers
